

Re: Minnesota Plumbers Bonds and Subsurface Sewage Treatment Systems Bonds

We are providing you with an update regarding administrative changes to these bonds.

The state recently developed a new combined form for the Plumber and Subsurface Sewage Treatment Systems bond requirements. We now have information that the state will continue to maintain two separate bond requirements. Each licensed Plumber and Subsurface Sewage Treatment System Contractor requires separate licensing and individual bonds for each license.

Some new bonds and renewal bonds have already been issued on the combined form. The state indicates that they will accept any bonds already issued on the combined forms for their 2010 renewals; however, any new bonds or renewal bonds that are issued going forward will again be issued on the existing separate bond forms.

If you have any questions, you may call the Minnesota Department of Labor and Industry, Construction Codes and Licensing Division at 651-284-5034 or give us a call at 800-331-6053. We write more bonds than any other company in the bonding industry, and we want your business!
